PROVIEWSIGNAGE

DASHBOARD GUIDE

Create, schedule and publish

A complete walkthrough of the PROVIEW SIGNAGE dashboard: media, playlists, layouts, schedules, TVs, sleep hours, users and more.

Contents

Every part of the dashboard at app.proviewsignage.co.uk, one step at a time.

01	Getting around	The dashboard works on a computer, tablet or phone.
02	The quick start	From nothing to a playing TV.
03	Media library	All your pictures, videos and PDFs in one place.
04	Create a playlist	A playlist is what plays on the screen.
05	Editor step 1 · Screen & layout	Choose the shape of the screen and how it is split.
06	Editor step 2 · Add / edit content	Fill each area with slides.
07	Text slides and widgets	Add information that updates by itself.
08	Editor step 3 · Schedule	Show slides only at certain times.
09	Editor step 4 · Choose TVs & publish	Send the playlist to your screens.
10	Managing playlists	From the Playlists page.
11	Screens	All your TVs at a glance.
12	A TV's own page	Everything about one screen.
13	Pause, stop and play a playlist	Take one playlist off your TVs for a while without changing any schedules.
14	Sleep hours	Switch TVs off out of hours and back on in the morning.
15	Video walls	Several TVs showing one big picture together.
16	Users and roles	Add people and control what they can do.
17	Notifications	The bell keeps you up to date.
18	Licences	Every TV needs an active licence to play.
19	Administrators: opening a business	For Proview staff.

How to use this guide. Each section is a set of numbered steps. Words in **bold** are the buttons and menu names you will see on screen. Yellow boxes are tips. The pictures show example content.

1 Getting around

The dashboard works on a computer, tablet or phone.

1. The menu on the left (or the bar at the bottom on a phone) has **Screens**, **Playlists**, **Media** and **Users**. Notifications, search, chat and your account are in the bar at the top.
2. If you manage more than one business, pick it in the drop-down at the top. Everything you see belongs to that business.
3. Your role is shown under your email: Administrator, Manager or Editor.

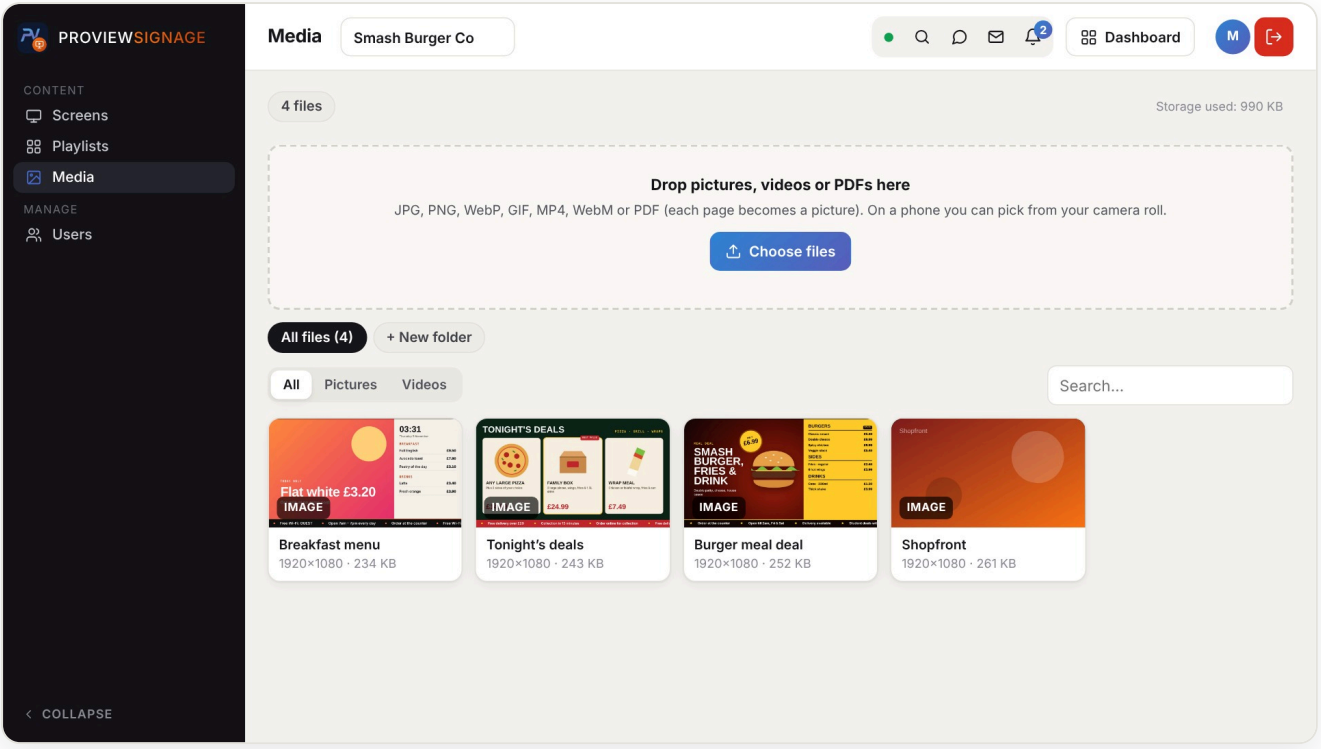

2 The quick start

From nothing to a playing TV.

1. Upload pictures, videos or PDFs in **Media**.
2. Create a playlist in **Playlists** (or start from a template).
3. Pair the TV in **Screens** → **Add a TV**.
4. In the playlist editor, go to step 4 and press **Choose TVs & publish**.

3 Media library

All your pictures, videos and PDFs in one place.

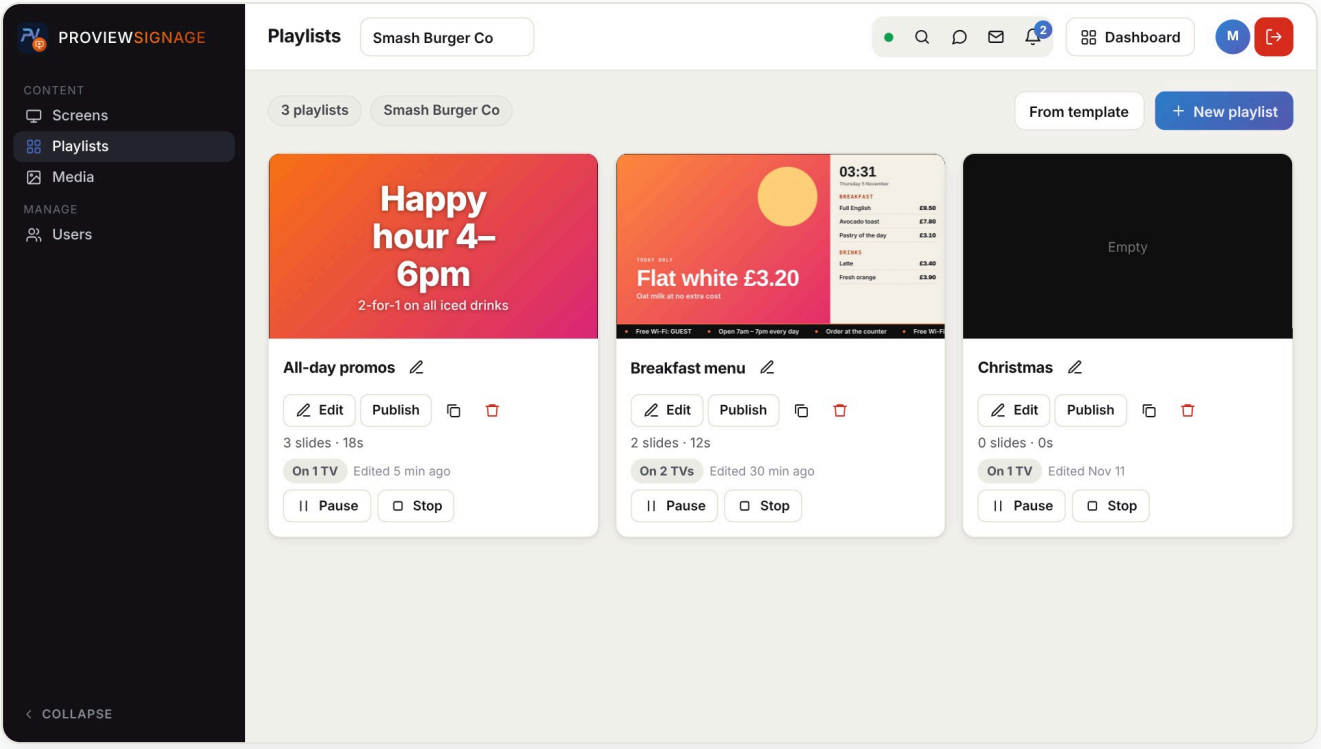

Media

1. Go to **Media** and drop files onto the page, or press the upload button. On a phone you can pick from your camera roll.
2. Pictures: JPG, PNG, WebP, GIF. Videos: MP4, WebM. PDFs: each page becomes its own picture.
3. Choose **Picture & video quality**: Recommended plays smoothly on every TV; 4K is sharper on 4K TVs but files are bigger.
4. Use folders to keep things tidy: type a new folder name, and uploads go into it.
5. Click a file to see its details, move it to a folder or delete it.

4 Create a playlist

A playlist is what plays on the screen.

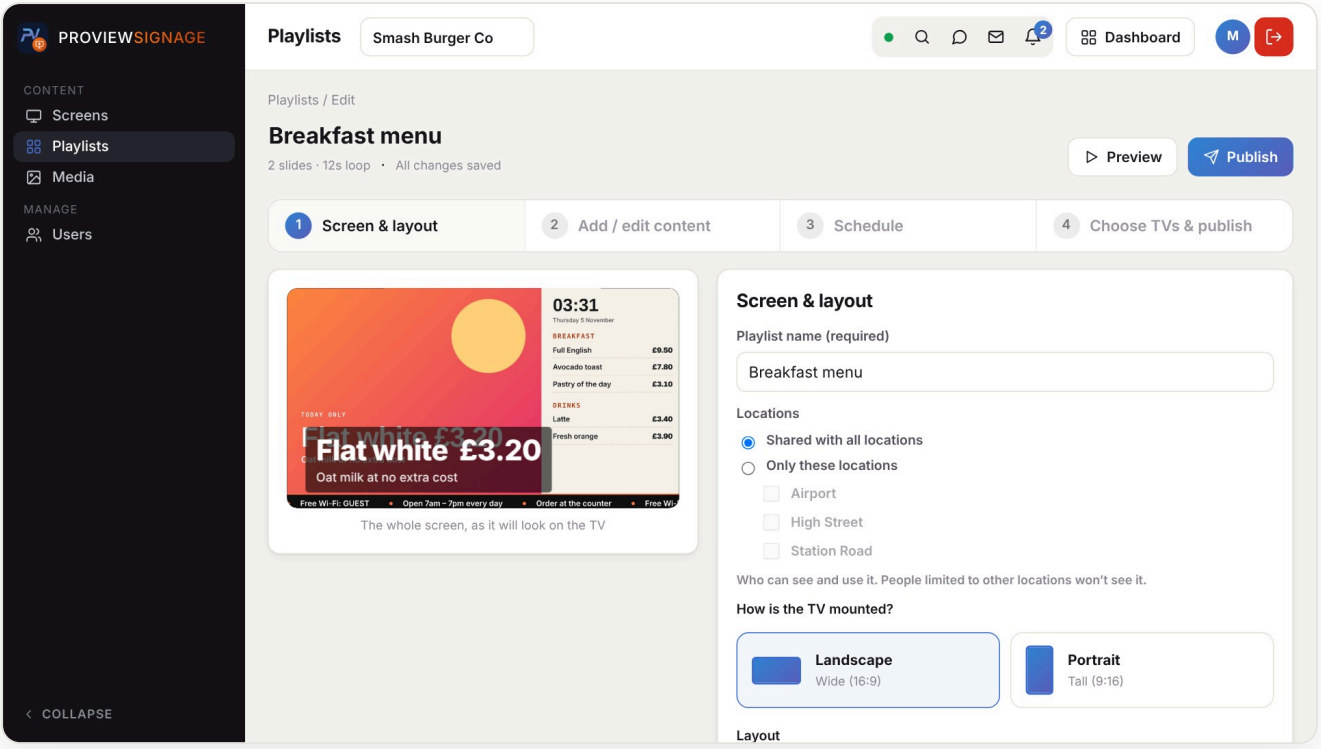

Playlists

1. Go to **Playlists**. Press **Blank playlist**, or pick a **template** with a ready-made layout.
2. The editor opens on step 1. Everything saves automatically as you go; there is no Save button.
3. The picture on the left always shows the whole screen, exactly as it will look on the TV.

5 Editor step 1 · Screen & layout

Choose the shape of the screen and how it is split.

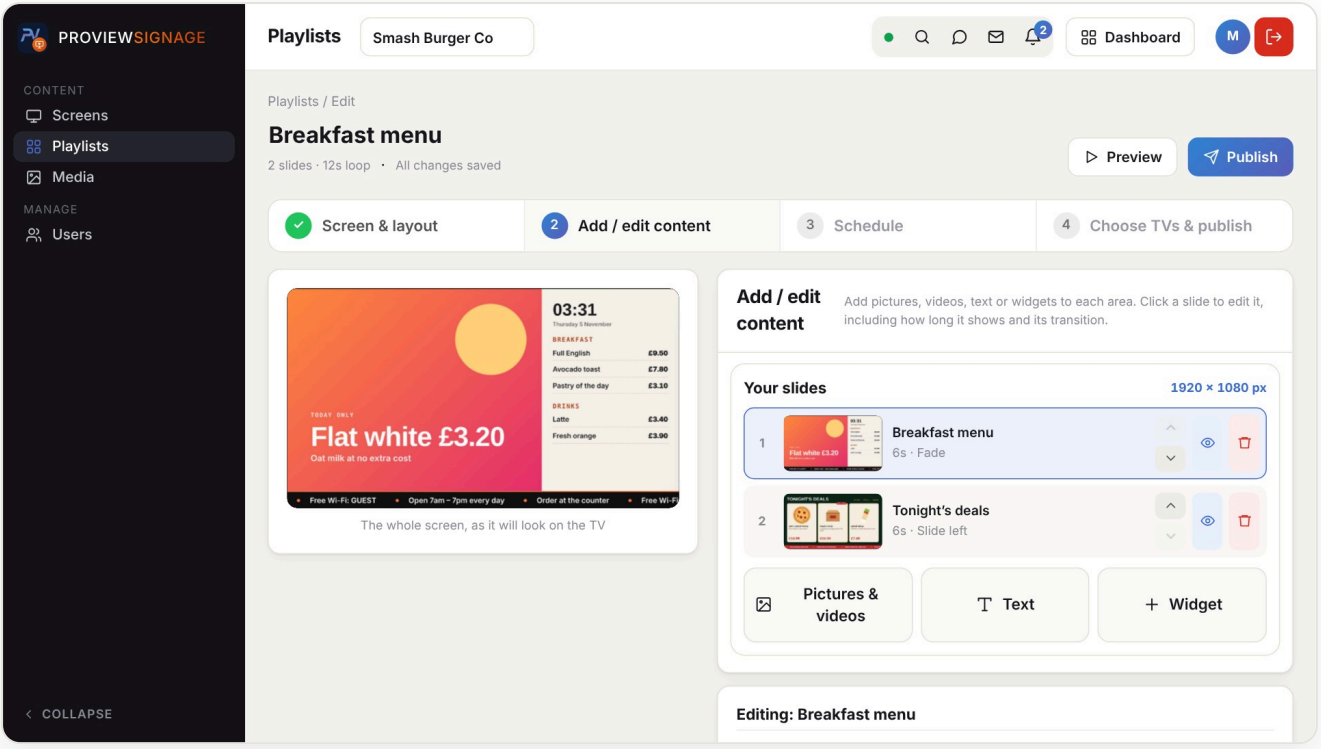

Step 1 · Screen & layout

1. Type the playlist name.
2. Choose **Landscape** or **Portrait**.
3. Pick a layout: full screen, side panel, split, three or four areas, and more.
4. Drag the sliders to change the size of each area. The exact size of each area in pixels is shown, so you can make content that fits perfectly.
5. Tick **Add a scrolling ticker** for a moving text strip. Choose where it sits (top, bottom, both, or inside one area), its text, speed, size, colours and direction.

6 Editor step 2 · Add / edit content

Fill each area with slides.

Step 2 · Add / edit content

1. Each area has its own box. Click an area's box (or click the area on the screen picture) to select it.
2. Press **Pictures & videos**, **Text** or **Widget** to add to that area.
3. Click a slide to edit it. The settings appear underneath.
4. **Timing**: how many seconds a picture shows. Videos play to the end unless you set a time.
5. **Transition**: how the slide arrives (fade, slide, zoom, circle…). **Motion effect**: movement while it shows (slow zoom, pan, flashing…).
6. **Fit**: Stretch to area, Fill (crop), Fit whole, or Fit + blur (fills the gaps with a blurred copy).
7. Use the arrows to change the order, the eye button to view a slide on its own, and the bin to remove it.

> **Tip:** Transitions only show when an area has two or more slides.

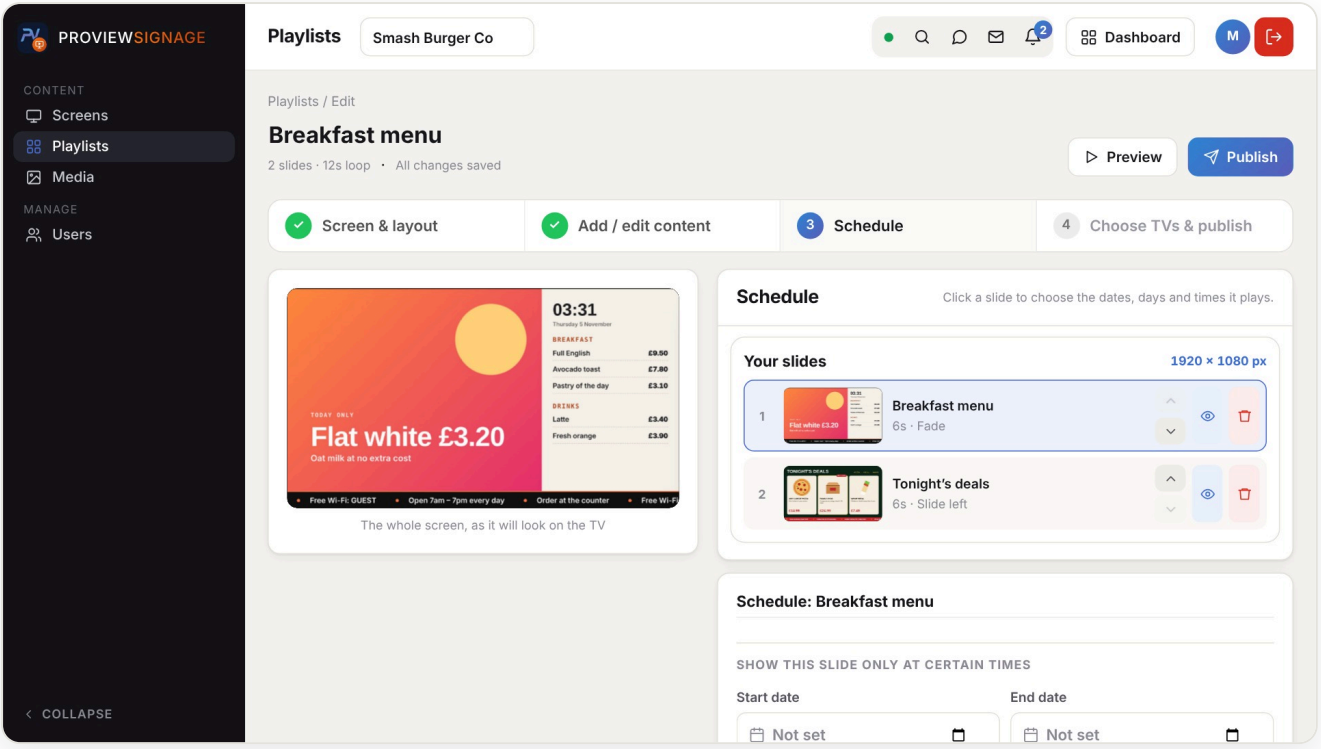

7 Text slides and widgets

Add information that updates by itself.

1. **Text**: a headline and subtitle on a colour or picture background, with animations.
2. **Widget** adds a box you can drag and resize on the slide: Text box, Clock & date, Weather, QR code, or Menu / price list.
3. Drag a widget to move it and drag its corner to resize it. Its settings appear under the slide.

8 Editor step 3 · Schedule

Show slides only at certain times.

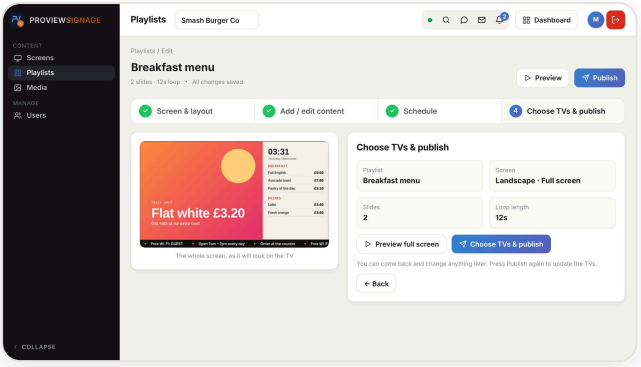

Step 3 · Schedule

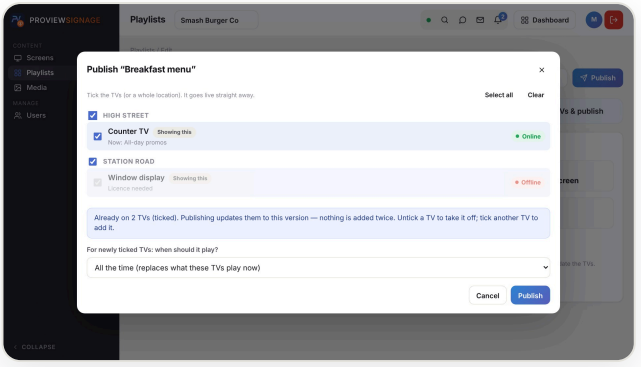

1. Click a slide and choose the dates it runs between, which days, and which hours.
2. Leave it empty to show the slide all the time.
3. Example: a breakfast offer only on weekdays 7:00–11:00.

9 Editor step 4 · Choose TVs & publish

Send the playlist to your screens.

Step 4 · Choose TVs & publish

Choosing the TVs

1. Check the summary, and press **Preview full screen** to watch it play.
2. Press **Choose TVs & publish**, tick the TVs, and choose **Always** or **At certain times**.
3. Press **Publish**. The TVs update within seconds, and you return to Playlists.
4. Changed something later? Press **Publish** again to update the TVs.

> **Tip:** If your business needs approval, an Editor's Publish becomes a request that a Manager approves.

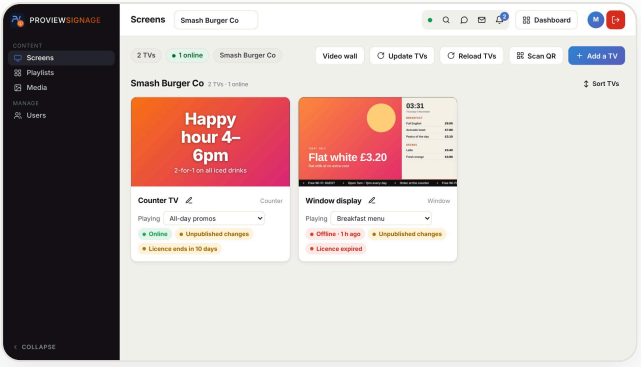

10 Managing playlists

From the Playlists page.

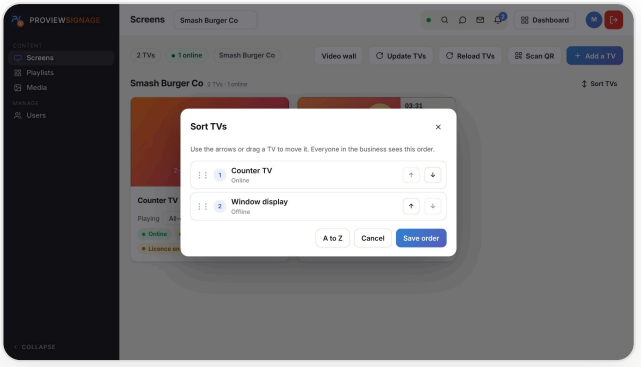

1. Press the pencil next to a name to rename it.
2. **Edit** opens the editor, **Publish** sends it to TVs.
3. The copy button duplicates a playlist; the bin deletes it.
4. Each card shows the number of slides, loop length, orientation and how many TVs use it.

11 Screens

All your TVs at a glance.

Screens

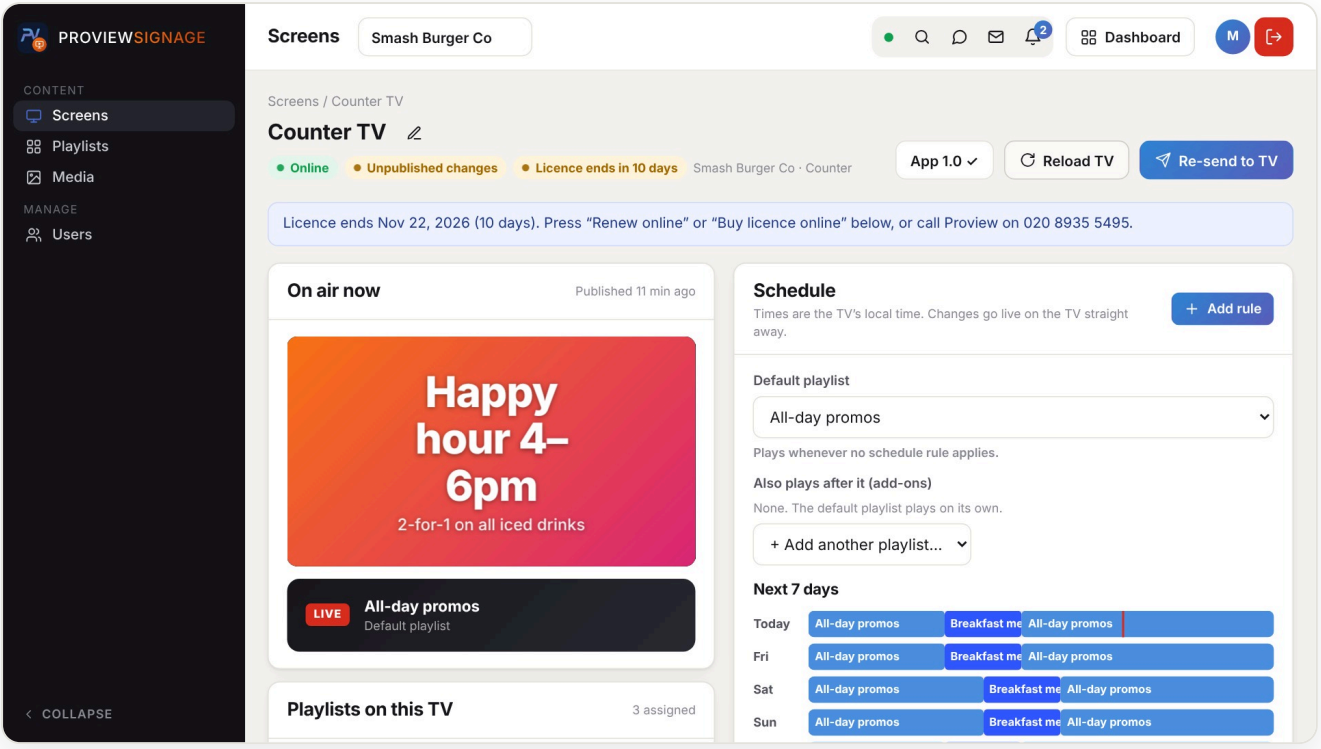

Sort TVs: choose the order

1. Each card shows what the TV is playing, whether it is online, its licence, and **Unpublished changes** if you edited something but didn't publish.
2. Change the playlist straight from the card using the **Playing** drop-down.
3. Press the pencil next to a TV's name to rename it.
4. Owner / Admins can press **Sort TVs** to choose the order the TVs are listed in: move a TV with the arrows or drag it, then press **Save order**. Everyone in the business sees that order.
5. Each business starts with one location, named after the business; it is set up for you. Locations can't be added or deleted here: Businesses are set up by Proview, and Proview links two businesses together in the licence portal; their TVs then show together here, grouped by location. Someone in more than one business switches business with the menu in the header.
6. Click a TV to open its own page.

12 A TV’s own page

Everything about one screen.

A TV’s own page

1. **On air now**: a live preview of what is playing.
2. **Playlists on this TV**: every playlist assigned to it, with an **Edit** button for each.
3. **Live screenshot**: press **Take screenshot** to see exactly what the TV is showing right now.
4. **Schedule**: the default playlist, add-on playlists that play after it, and rules for certain days and times. Rules marked Override or High win over others.
5. **Licence**: plan, start and expiry, with **Renew online**.
6. **Device**: model, app version, resolution, last seen.
7. Top buttons: **Reload TV**, **Update app**, **Re-send to TV**. The pencil edits the name, location, position and screen rotation.

13 Pause, stop and play a playlist

Take one playlist off your TVs for a while without changing any schedules.

1. Open **Playlists** (or a TV's page, under **Playlists on this TV**).
2. **Pause**: choose how long (30 minutes, 1 hour, 2 hours, until the end of today, until tomorrow 06:00, or a date and time). TVs skip the playlist and play whatever else is scheduled, then go back to it by themselves.
3. **Stop**: TVs skip the playlist until you press **Play**.
4. **Play**: puts it back on the TVs straight away.
5. A paused playlist shows **Paused until …**, a stopped one shows **Stopped**. If it was the only thing on a TV, that TV shows a blank screen meanwhile.

> **Tip:** Pausing doesn't publish anything: edits you haven't published stay unpublished.

14 Sleep hours

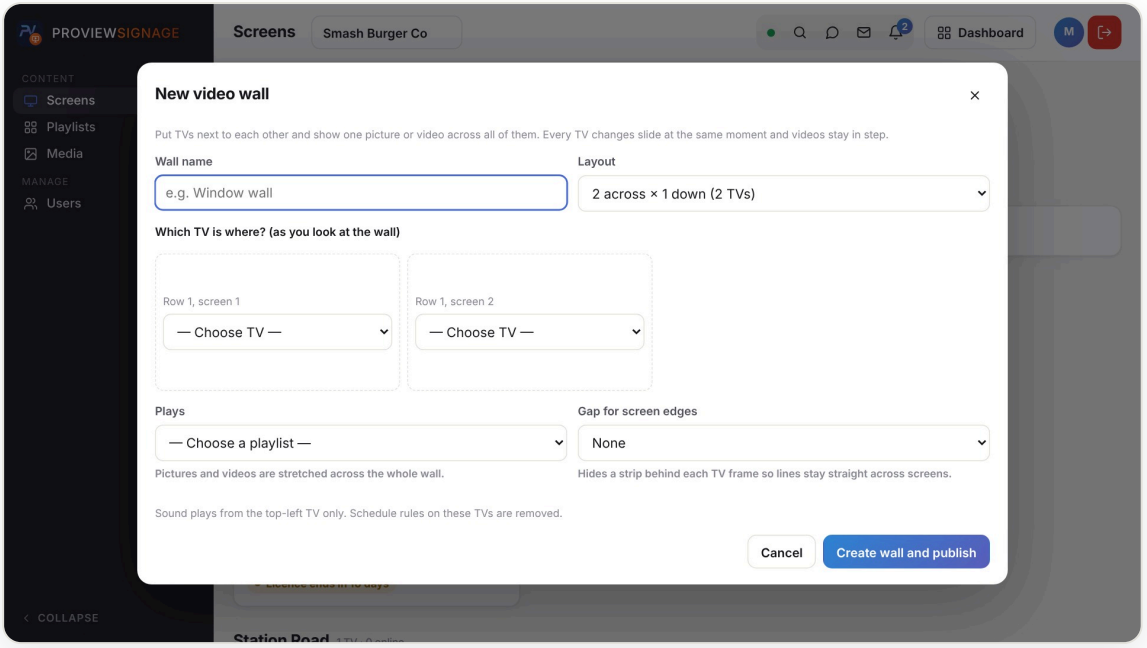

Switch TVs off out of hours and back on in the morning.

1. Open a TV from **Screens**. Find the **Sleep hours** card and press **Edit**.
2. Tick **Switch this TV off out of hours**, then choose **Switch off at** and **Switch on at** (the TV's local time), and the nights it applies.
3. Choose **Switch the TV off** (best: saves power; needs a one-off Allow on each TV) or **Black screen only** (works on every TV).
4. Under **Apply to**, choose this TV, every TV at the same location, or all your TVs, then press **Save**. TVs pick it up within seconds.
5. Need it on outside its hours? Press **Wake now** on the TV's page (stays on until the next switch-off). **Sleep now** switches it off early. **Back to normal hours** cancels either.
6. On the Screens page a TV in its sleep hours shows **Sleeping until …** instead of Offline.

> **Tip:** A TV that is fully switched off can't receive Wake now until it wakes at its set time: press OK on its remote to wake it straight away.

15 Video walls

Several TVs showing one big picture together.

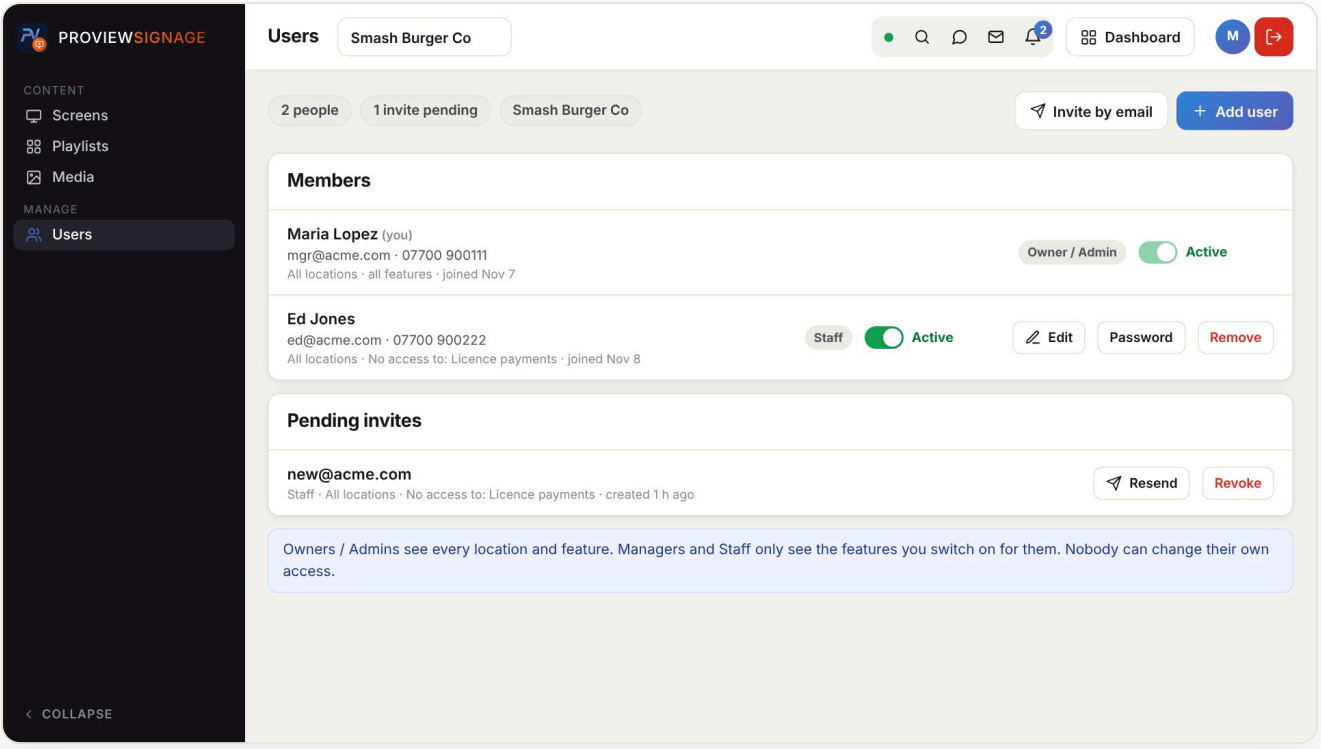

Setting up a video wall

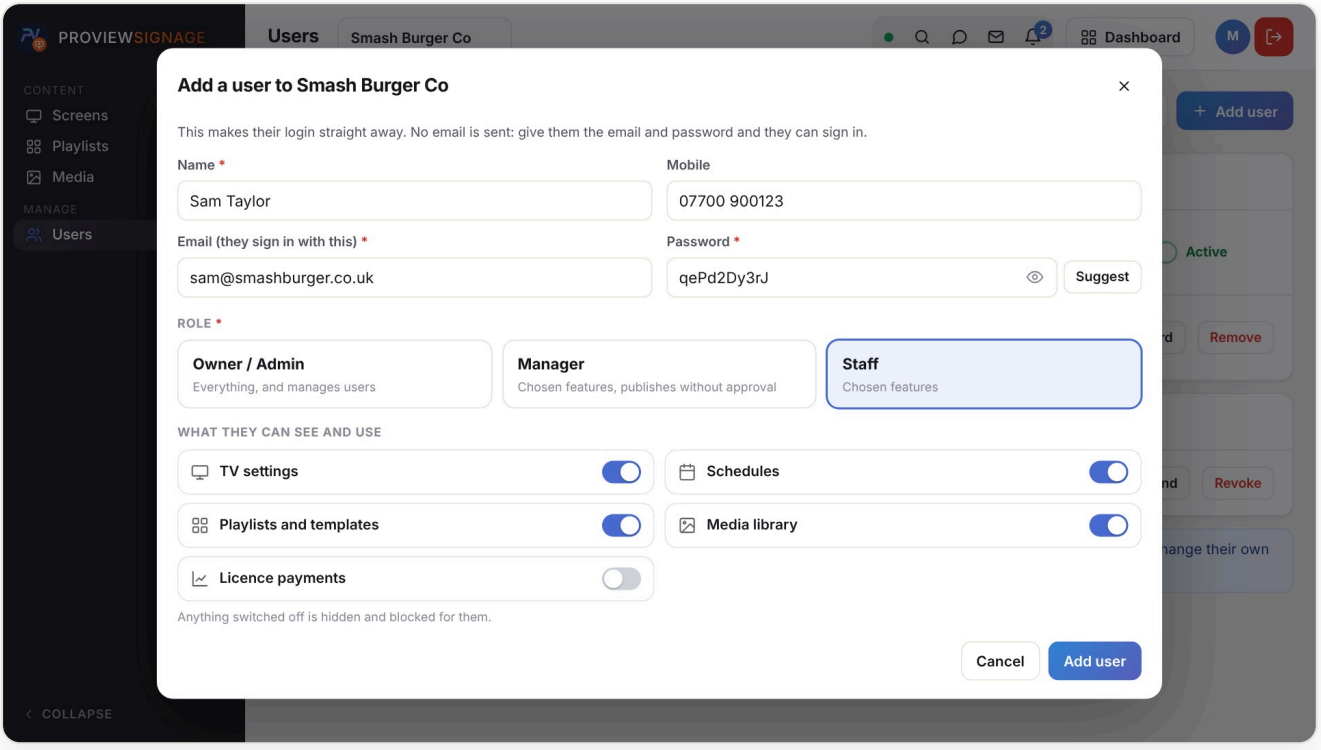

1. On **Screens**, press **Video wall**, name the wall and set the number of columns and rows.
2. Say which TV is where, as you look at the wall, and set the gap for the screen edges (bezels).
3. Choose what the wall should play. Pictures and videos stretch across the whole wall, and every TV starts and finishes together.
4. Remove a wall at any time: each TV goes back to its own picture and nothing is deleted.

16 Users and roles

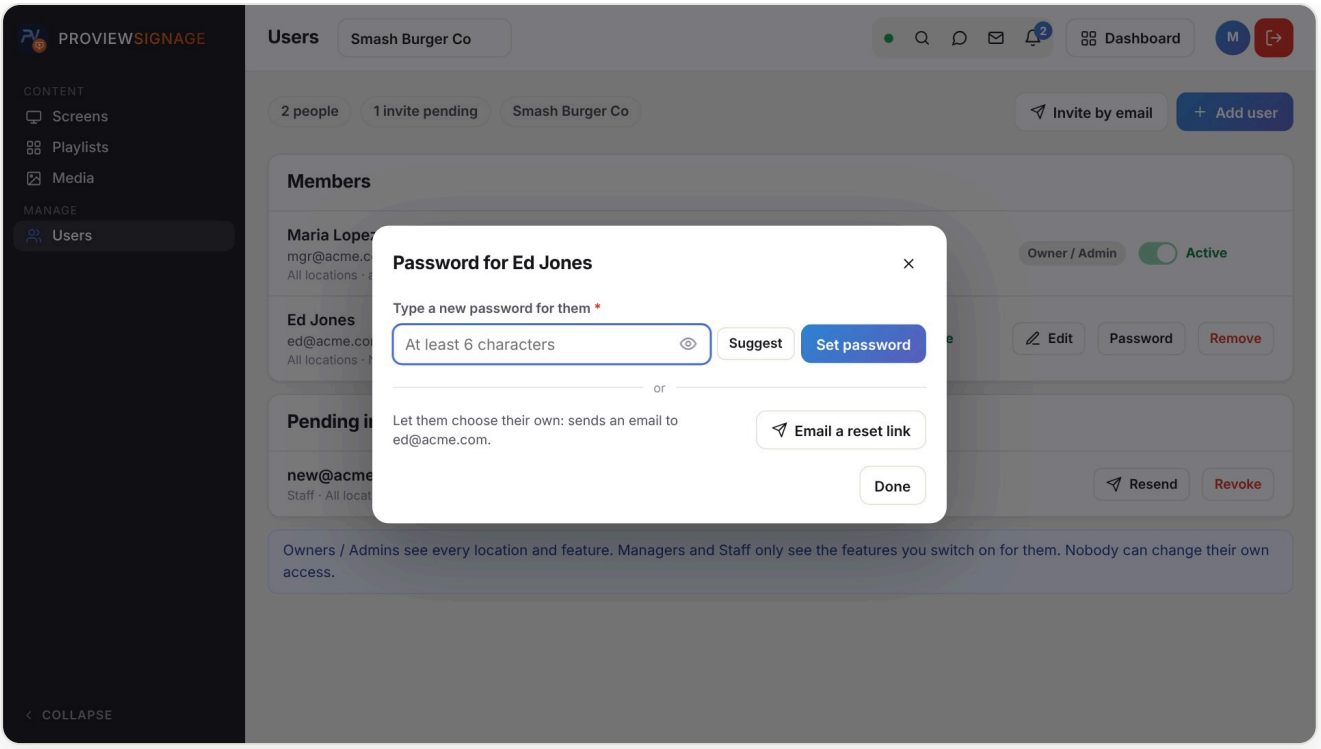

Add people and control what they can do.

Users

Add user

Password: type a new one or email a reset link

1. Go to **Users** and press **Add user**. Enter their name, email and a password (press **Suggest** for a random one), and their mobile if you like. Fields with a red * must be filled in.

2. Choose their role. **Owner / Admin**: every feature, adds TVs, manages users. **Manager**: only the features you switch on, publishes without approval. **Staff**: only the features you switch on.

3. For a Manager or Staff, switch each feature on or off under **What they can see and use**. Anything switched off is hidden and blocked for them.

4. Press **Add user**. No email is sent: their login works straight away. Copy the login details shown and pass them on yourself.

5. Prefer them to set their own password? Press **Invite by email** instead. Send the invite email, or copy the link and send it yourself (WhatsApp, text...).

6. Press **Edit** next to a person to change their name, mobile, role or features. Nobody can change their own access.

7. Press **Password** next to a person to type a new password for them, or to email them a reset link so they choose their own.

8. Use the switch on a person's row to deactivate their account (red) or activate it again (green). A deactivated person can't sign in to the business; their role and access are kept for when you switch them back on. An Owner / Admin can only be deactivated by Proview.

9 Playlists and media are shared with all locations unless you pick **Locations** for them (on the playlist's **Screen & layout** step, or in a file's details). Managers and Staff only see shared items and items for their locations; what they create is kept to their locations, and shared items are view-only for them (they can duplicate a playlist to make their own copy).

17 Notifications

The bell keeps you up to date.

1. It shows offline TVs, licence reminders and payments.
2. A number on the bell means there is something new.

18 Licences

Every TV needs an active licence to play.

1. New TVs have no licence until one is bought (there is no free trial).
2. A TV's licence is shown on its card and its page. You get reminders before it ends.
3. Renew on the TV's page with **Renew online**, or contact Proview.

19 Administrators: opening a business

For Proview staff.

1. Businesses are opened from the licence portal (license.proviewcrm.co.uk): on the business's page press **Open in Signage**.

2. Signage opens in a new tab inside that one business, with a "Viewing … as Proview" bar and a link back to the licence portal.

3. New businesses are added in the licence portal with **New business**. Two businesses are linked (or unlinked) there with **Link with another business…**: their TVs, playlists, media and people then share one business, and its TVs show together on the Screens page, grouped by location.

4. Alert emails and offline alerts for the whole platform are under **Platform settings** at the bottom of the menu.
